

Chronic Condition Management Program

CHRONIC CONDITIONS ARE COSTLY

With healthcare costs escalating, you need solutions which will help you with cost containment and ensure members receive high quality care. Through advanced data analytics, we identify individuals who would benefit from our programs.

In the United States, 75% of healthcare spending driven by individuals with chronic conditions.

Telligen's certified Chronic Care Professionals, nurses, behavioral health professionals and diabetic educators build relationships with members and their families and/or caregivers to understand their conditions and improve health outcomes.

- Maternity
- Obesity
- Coronary Artery Disease
- Congestive Heart Failure
- Depression
- Anxiety
- High Blood Pressure
- Chronic Kidney Disease
- NAS

- Cancer
- Chronic Pain & Musculoskeletal
- Other conditions

HOW IT WORKS

We use data analytics to identify individuals with chronic conditions who will clearly benefit from health coaching. Our health coaches work with your members to understand their conditions, coordinate treatments with healthcare providers and monitor their progress so health is maintained and costs are managed.

Telligen Health Coaching is an ongoing, collaborative program between the member and their health coach. Throughout the program, the coach and member will communicate regularly telephonically and through Telligen's health app to assess needs and set goals. The Telligen health coach will provide support and education throughout the experience. When goals are met, the health coach will document and share the outcomes with the member. Together, the health coach and member will re-assess the member's needs and, if needed, set new goals.

My health coach's compassion, knowledge and understanding helped me achieve a successful lifestyle. I am now walking daily, monitoring my blood pressure and eating a balanced diet. I am extremely happy to see that Telligen takes the time to help their members in time of difficult health situations.

THE TELLIGEN DIFFERENCE

- Dedicated health coach
- Motivational interviewing
- Program engagement is twice the industry average
- Detailed initial assessment and evaluation of readiness to change
- Collaboration with the treating providers
- Member-centric action plan
- Personalized and customized educational materials
- Re-assessment and support ongoing based upon progress related to treatment plan goals and clinical indicators
- Staff expertise with diverse clinical and educational knowledge, leading to improved outcomes for your members
- Interdisciplinary team
- High member satisfaction
- Behavioral health assessments and substance abuse recognition are tied into every Telligen health solution
