

Configurable, Workflow-Driven Module

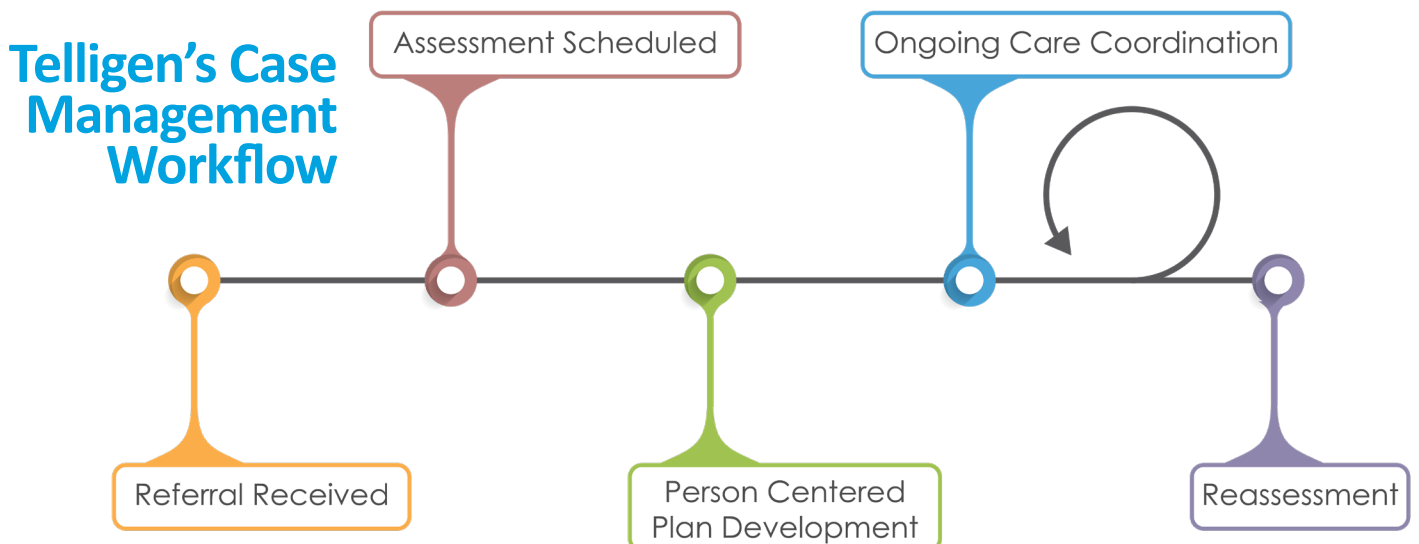

In collaboration with case managers, providers, and members we have developed our Qualitrac® Case Management module to support a comprehensive person-centered care coordination process by combining innovative technology and user-friendly design in a cloud hosted SaaS product that integrates easily into your population health enterprise systems environment.

Effectively manage the whole person with Qualitrac. Using our Member Hub, our Care Team portal, and our mobile app, the case manager, member, and member’s care team can effectively communicate and manage the member through their LTC, behavioral health, or medical needs. Qualitrac guides the case manager through the process while also giving them flexibility to configure and adapt to the unique needs of every member. Communication and information sharing is available with our accessible solution for the member’s care team including natural supports and community-based organizations.

Qualitrac provides an always-evolving set of features including:

Case Management Module Features	
Configurable business rules	FHIR-enabled batch and real-time data interfaces
Comprehensive, integrated member view	Automated referral creation
Library of configurable assessments	Person-centered plan development
Integrated service authorizations	Scheduling and assessment tracking
On-demand dashboards and reporting	Fully integrated risk stratification process
Member mobile app	Online access for the member’s entire care team
